

PNM American Indian Summer Engineering Internship Program

Deadline to apply is May 22, 2018

PNM is proud to announce paid summer College Engineering Internships available in the greater Albuquerque area.

PNM will fill three (3) temporary internship positions. Interns will perform assignments designed to enhance engineering knowledge and abilities. Interns will provide basic engineering support on timely operational and customer related-engineering projects with guidance from Project Engineers and Planners.

The positions will also provide opportunities to engage with company leaders and other stakeholders and customers to represent Native American interests affecting the utility industry. Interns will periodically interact with the Tribal Government and Customer Relations Team. Candidates need to be familiar with Native American culture and tribal governance to assist the Tribal Government and Customer Engagement Team with any necessary projects.
